Projects

Movibes - An website to show movie info
The IMDb Rating Lookup Website, built with ReactJS, retrieves IMDb ratings and movie details using the OMDB API. It offers a user-friendly interface for quick movie information access, making it a handy tool for movie enthusiasts.
Key Features:

1. IMDb Ratings: Get IMDb ratings for movies by searching with the movie title.
2. Movie Info: View detailed information like release year, genre, director, and actors.
3. Responsive Design: Enjoy a seamless experience on desktop and mobile devices.

Technical Details:

- Front-End: ReactJS for the user interface.
- API Integration: OMDB API for movie data retrieval.
- Design: HTML, CSS.

Portfolio Website
A ReactJS Portfolio Website is a cutting-edge and interactive platform designed to showcase an individual's or professional's work, skills, and achievements in a dynamic and engaging way. Leveraging the power of React, this type of portfolio website offers a highly responsive and user-friendly experience, incorporating various features and components to present your content effectively.
